

## Your Ideal LIMS

Forensics and  
Medical Examiners

### SOLUTION OVERVIEW

Manage your cases, evidence and samples in a secure, auditable environment with LabLynx ELab LIMS for Forensics and Medical Examiners. With our configurable, flexible solution, you can manage every aspect of your lab's data and operations.

The LabLynx solution for Forensics features a specially designed version of our ELab LIMS that is highly flexible, industry driven and delivered using state-of-the-art hybrid virtual cloud-hosting technology.

### WHY CHOOSE US

- Flexible
- Scalable
- Expandable
- Secure
- Cloud Hosted
- 24/7 Live Support

#### Full Case Management

Manage your case with air-tight documentation from investigation to completion of an autopsy and disposal.

#### Cross Departmental Workflows

Track samples across all of the departments in your laboratory including toxicology, anthropology histology and more.

#### Request Management

Track all requests by case including requests for: medical records, neurology review, family inquiries and more.

# LabLynx Features and Benefits

<p><b>Chain of Custody Tracking</b></p> <p>Check in/out evidence, bodies, etc. and record all transactional information with details about who took possession, when and verify each action with a witness signature.</p>	<p><b>Case Time Tracking</b></p> <p>Track in the LIMS how long it takes for you and your team to close a case from start to finish. All data is reportable and available for trend and KPI analysis.</p>
<p><b>Reporting Templates</b></p> <p>Report templates can be generated for autopsy, toxicology, investigation, annual statistics and other lab data for quick, accurate and efficient data sharing.</p>	<p><b>Pathology Dashboards</b></p> <p>Keep an eye on your team's KPIs using pathology dashboards to visually display the year, month, autopsy percentage and turn around times for autopsies performed.</p>
<p><b>Document Hosting &amp; Management</b></p> <p>SOPs, training manuals, certificates, regulatory files, receipts, manage your lab's vital operations documents within your LIMS for easy access.</p>	<p><b>Security</b></p> <p>ELab LIMS offers varying security level profiles to control access by user and ensure only information relevant to the user's role is accessible.</p>
<p><b>Photography Module</b></p> <p>Forensic photos can be stored and linked directly to a case. This can include crime scene images, evidence images, x-rays and more.</p>	<p><b>Mass Casualty Management</b></p> <p>In the LIMS, you can associate cases by mass disaster events, geographically map where bodies were found and mark on diagram if limbs were found.</p>
<p><b>Instrument Interfaces</b></p> <p>Our system can automate data entry from your lab equipment as ELab LIMS integrates with most laboratory instruments.</p>	<p><b>Third-Party Integrations</b></p> <p>Whether connecting with a business platform or external service, LabLynx's ELab LIMS is expandable to connect with most third-party services.</p>
